

Assignment 3

40 marks

Instructions:

1. This is an individual assignment.
2. The assessment is divided into mainly two parts. The first part comprises of two sub parts (code + Github). The second part is a report writing part.
3. There should not be any use of AI for this work. No form of cheating will be acceptable.
4. Ensure your work is well organised.
5. Do not share your work with anyone other than the teacher.
6. Make sure to complete the entire work before submitting.
7. If you do not understand anything then please contact your teacher.
8. Students would be submitting the report with the GitHub link inside it.

All the best.

Part 1

30 marks

For this assessment, you will have to create a GUI based application using Java programming language that can keep a track of your weekly expenditure. (Write a well commented code)

Use GUI toolkit available in Java.

The application should at least have the following features

1. Day (which the user can choose from a dropdown menu)
2. Category (which the user can choose from a dropdown menu)
 - 2.1 Category dropdown menu shall have the following options:
 - 2.1.1. Groceries, Eating Out, Petrol, Taxi, Bills, Rent, Others
3. Amount (Where a user can enter how much money he spend on one category)
4. Description (where user can provide description on the amount spend)
5. Keys to add expense, getting total weekly expenses and to view all the weeks expense grouped by category.

The program should be written in a way so that it can handle errors or edge cases.

Students have to submit their work on Github.

Make a repository and show your work step by step. There should be at least 5 reasonable commits with proper commit messages.

Part 2 (1200 words)

10 marks.

Now that you have done part 1, write a report summarising design and development process and provide details of the test cases you have used to test the major functions of the program.

Student should have at least 5 test cases with screenshots in the report.

Explain what best practices did you use in the programming part.

The Report should have the link to the GitHub account.
